**DETAILED ACTION*****Allowable Subject Matter***

Claims 1-10 are allowed.

Claims 1-6 are allowed for reasons given in the previous action.

The following is an examiner's statement of reasons for allowance claims 7-10:

Kuo et al, US Patent No. 7,031,343 B1, discloses "Point-to-multipoint passive optical network that utilizes variable-length packets". Kuo does not teach or fairly suggest the following features that are recited in independent claim 7:

A grant scheduling method in a multi-point control protocol (MPCP) processing method over an Ethernet Passive Optical Network (PON) including an Optical Line Termination (OLT) and an Optical Network Unit (ONU), the method of grant scheduling comprising:

- (a) determining a length of grants separately for static and dynamic grants;
- (b) determining a start time of the grants after the static and dynamic grants are multiplexed;
- (c) subtracting a round trip time (RTT) value of the corresponding ONU from the start time, and
- (d) scheduling the grants based on the length of the grants and the start time of the grants, and sending the grants to the ONUs,

wherein the step (b) further comprising a last scheduled time register which is incremented for each generated grant as much as the length of the grant and after this increment, becomes the start time of the following grant, and when

there no scheduled grants occur for a predetermined time, and the last scheduled time register is a past value or the last scheduled time register is not sufficiently ahead of the current time by a predetermined time, the last scheduled time register is advanced to a future time with a predetermined minimum offset.

Claims 8-10 are allowed because they depend on allowed claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
